

## Discussion Questions

1. Does the concept of trees having a community relationship & the scientific explanations of their possible means of communications change how you view our relationship with forests? If so, how?
2. What do each of The Three Sisters – corn, beans, and squash - bring to their reciprocal relationship? How can this partnership create a stronger community? Can you think of other examples of such win-win situations?
3. The author observed, “environmentalism becomes synonymous with dire predictions and powerless feelings.” What action can you take to bring about positive environmentalism & ecological restoration & preservation?
